

**Organization Profile Form**  
**April 1, 2017**

Organization name: **Blue Bear LES**

Kind of organization: Company

**FORENSIC SOFTWARE:**

**Automated analysis and categorization of media-evidence**

---

BlueBear is a Canadian innovative software shop focused on forensic software solutions for Law Enforcement. Our objective is to design and develop software that gives law enforcement and intelligence communities the solutions they need to do their jobs effectively, efficiently and successfully.

BlueBear's technology was created because of a demand by Law Enforcement agencies for an easy to use forensic tools that will automate and assist in the expedient processing of very large amounts of confiscated images and videos files. With this in mind, BlueBear provides a suite of tools for use by Law Enforcement mainly in online Child Exploitation cases and the identification of individuals associated with these and other cases. BlueBear's flagship product is called LACE

---

**Products and Services**

BlueBear LACE is best-in-class software solution for carving, processing, categorizing and managing massive volumes of visual media. LACE is no frills, rock solid and it enables investigators to efficiently review and analyse vast amounts of image and video data, dramatically reducing the time and resources required to bring a case to court. LACE comes in a client-server configuration that allows multiple investigators and analysts to work simultaneously in interaction with a visual media database that is optimized to process hundreds of millions of images and frames.

**Core Competencies:**

Expertise in :

Forensic Image/video recognition that automates the analysis and categorization of visual material

Computer forensic carving

Biometric face extraction and matching

Voice biometric
