Kind of organization: **Company**

CYBER SECURITY SOLUTIONS

Network Security Monitoring and Threat Hunting

WAW Technologies Inc. is commercializing intelligent hardware and software sensors for continuous network traffic behavior monitoring. Our market focus includes security consultancies and end user organizations concerned with security monitoring of high value users, digital investigations, difficult to monitor network devices (e. printers, VOIP phones), early detection of advanced persistent threats (APTs), and GDPR compliance.

Products and Services

Our product, CatchWire, is sold worldwide. It enables IT security professionals to perform continuous, real-time communications monitoring of activities and behaviors of workstations, servers and other network devices. Our network sniffer delivers real-time data to leading collector and analytics applications to help address common security challenges including: internal IDS, communication monitoring, data leakage, botnet and worm detection. CatchWire can be configured and used without an IP address.

Core Competencies:

Advanced Threat Detection: Internal IDS; data leakage; botnet detection; worm detection; etc.

Compliance – Waw product helps achieve compliance with DPD/GDPR, HIPPA, PCI DSS, SCADA, NIST, ITSG-33, FISMA, COBIT; etc.

Network Troubleshooting and Planning: Network edge view of traffic usage; planning for capacity upgrades and elimination of bottlenecks; etc.

Forensics and Investigations: Continuous, flow-based information; attack history reconstruction; reporting on one multiple users; etc.

Internal penetration testing: Simulate inside/client-side attacks on the network to determine the adequacy of the existing security controls.

Continuous industrial process monitoring: Industrial Control System (ICS), SCADA

Security services : Architecture design and assessment.

Current foreign representation: No? Yes? If yes, please answer the following:

- Company subsidiary, joint venture or affiliated company (identify)
- Distributor or agent (identify)
- Licensing arrangements (identify)
- X - Other (explain) EU agent responsible for sales and business alliances

Relationships: Waw is seeking the following:

- X Value Added Reseller, Security consultancies –
- X Dutch early adopters/customers willing to provide us with technology validation of functionality, performance, quality and usability.
- X Dutch partner to complete a joint R&D project in the big data mining/data analytics/machine learning space,
- X Find corporate investors
- X Licensing Opportunities (in or out)
- To invest in other companies

Meeting interest: Waw would like to meet with the following:

- X Meet with companies for collaborations, projects and synergies
- X Meet with government authorities
- Meet with universities and research centers
- Other (explain) –
