

RESILIENCE ENHANCEMENT AGAINST CBRNE TERRORISM (REACT)

GOAL OF THE PROJECT

The REACT (Resilience Enhancement Against CBRNe Terrorism) - project aims to improve the resilience of the International Zone in The Hague against CBRNe terrorism. By the end of the project the municipality The Hague, will have a more effective and innovative response capability in regard to CBRNe incidents. More specifically, the resilience of the

REACT

International Zone (World Forum) against terrorist attacks and other calamities will be enhanced. Also innovative product development and testing will take place within the project.

RESULTS/APPLICABILITY

- A risk analysis and a vulnerability assessment for the World Forum is conducted;
- Development of an innovative air-cleaning filter system, to be used/implemented, for instance by the World Forum;
- A software system that quickly and clearly maps out the danger area (hot zone) in case of a CBRNe attack or incident on a computer screen will be developed; and
- Decontamination system for vehicles will be developed.

CURRENT STATUS

The project started on May 1st 2010 and will run for 24 months. The consortium consists of a mixture of SMEs, research institutes and end-users. The partners are Virus Free Air, Prometech BV, World Forum, Safety Region The Hague, SUJCHBO - Czech state laboratory. IB Consultancy acts as coordinator and product developer within the REACT project.

The project touches upon a lot of different fields and organizations in society. This variety makes it a challenging and exciting project to coordinate. Also the development of innovative products, which we can use to make this world a safe and more secure place, is stimulating and rewarding.
